

Solution Series

MOTORS

Our QS 9000 certification is your assurance that every Rad Fan and Blower Motor coming out of our Ontario Canada facility is the best that money can buy.

Our unequalled offering of over 330 Blower Motors, 200 Rad Fan Motors and 230 Cooling Fan Assemblies is your guarantee of unparalleled coverage.

But we don't believe in resting on our laurels. We believe in solving problems and because new problems constantly arise, Four Seasons continues to find solutions:

Problem: Ford Taurus/Mercury Sable plastic O.E. Motor which accumulates moisture in the form of condensation making it a high premature failure item.

Solution: Four Seasons' #35071 with redesigned metal flange totally eliminates the problem caused by the O.E design.

Problem: Replacing Cadillac's brushless motor with the O.E. requires cradling the vehicle's engine and over two hours of installation time.

Solution: Four Seasons' #35121, total replacement time takes less than one hour.

Problem: I need a quality motor that can provide more coverage with less SKU's?

Solution: Four Seasons #35061 replaces nine different original equipment motors and covers 15 different vehicle models. Our motor will save you a great deal on inventory and shelf space.
