

2025 NEW ITEMS JULY

Engine Coolant Filter

Four Seasons® is pleased to announce the release of two new coolant filters designed to remove harmful particulates from the system before they reach critical components, helping to extend heater core life and improve overall system reliability. This easy-to-install upgrade is available in 5/8" and 3/4" sizes to fit most vehicle applications.

P/N 84795

5/8" hose diameter

P/N 84796

3/4" hose diameter

Features & Benefits of the Engine Coolant Filter

- Transparent sight-glass construction to monitor coolant flow, quality and presence of debris
- Simple DIY installation
- Prevents rust, dirt and debris in the cooling system from entering the heater core
- Includes magnet and mesh screen for collecting debris
