

# HEAVY DUTY CABIN AIR FILTERS

JUST BECAUSE AIR IS  
COMING OUT OF THE AIR  
CONDITIONING VENTS,  
DOESN'T MEAN IT'S CLEAN!

Four Seasons® now offers an inexpensive way to breathe easier and cleaner with 15 new part numbers covering the most popular heavy duty applications!

### *An inexpensive way for you customer to breathe easier and cleaner!*

Cabin air filters are designed to remove contaminants such as pet dander, dust, soot and exhaust fumes from the air we breathe inside our vehicle. Don't assume that because air is coming out the vents, that it's clean. A/C systems are designed to heat and cool the air, not clean it. Increase air quality by making sure Cabin Air Filter's are replaced every 12 months or 12,000 miles.
