(18-06) Ford
(14-06) Lincoln
(11-06) Mercury

INTRODUCING THE DESLUGGER® FOR FORD E-SERIES APPLICATIONS

Due to the success of The Deslugger® product line, Four Seasons is pleased to announce a new addition to The Deslugger® offering, P/N 36150, for Ford, Lincoln and Mercury applications.

Having the system pulse during initial startup is beneficial to the compressor regardless of where the compressor is mounted. If liquid is pooled anywhere in the system, the compressor will have issues compressing the liquid, making The Deslugger® a valuable component.

The Deslugger® is a patented exclusive product line of Standard Motor Products.

P/N 36141 - GM Applications

P/N 36142 - Chrysler / Dodge Applications

P/N 36140 - Honda CRV Applications

The next time you have a compressor replacement, insure the job by installing The Deslugger®.
